ELSEVIER

Journal of Hydrology 212–213 (1998) ix

Journal of Hydrology

Contents

Publisher's Note v
Preface 1
The energy budget of a spruce forest: field measurements and comparison with the forest–land–atmosphere model (FLAME) 22
J. Constantin, M. G. Inclan and M. Raschendorfer
Water storage and evaporation as constituents of rainfall interception 36
W. Klaassen, F. Bosveld and E. de Water
Carbon dioxide exchange at leaf and canopy scale for agricultural crops in the boreal environment 51
H. Soegaard and H. Thorgeirsson
Analysis of carbon and water fluxes from the NOPEX boreal forest: comparison of measurements with FOREST-BGC simulations 62
E. Cienciala, S. W. Running, A. Lindroth, A. Grelle and M. G. Ryan
A canopy conductance and photosynthesis model for use in a GCM land surface scheme 79
P. M. Cox, C. Huntingford and R. J. Harding
A case study on variational soil moisture analysis from atmospheric observations 95
U. Callies, A. Rhodin and D. P. Eppel
Treatment of soil, vegetation and snow in land surface models: a test of the Biosphere–Atmosphere Transfer Scheme with the HAPEX-MOBILHY, ABRACOS and Russian data 109
Z.-L. Yang, R. E. Dickinson, W. J. Shuttleworth and M. Shaikh
Recent progress and results from the Project for the Intercomparison of Landsurface Parameterization Schemes 128
A. J. Pitman and A. Henderson-Sellers
Which type of soil–vegetation–atmosphere transfer scheme is needed for general circulation models: a proposal for a higher–order scheme 136
R. Avissar
Regional surface fluxes over the NOPEX area 155
M. Frech, P. Samuelsson, M. Tjernström and A. M. Jochum
NOPEX—a northern hemisphere climate processes land surface experiment 172
S. Halldin, L. Gottschalk, A. A. van de Griend, S.-E. Gryning, M. Heikinheimo, U. Högström, A. Jochum and L.-C. Lundin
Applications of passive microwave observations of surface soil moisture 188
T. Schmugge
A remote sensing surface energy balance algorithm for land (SEBAL) 1. Formulation 198
W. G. M. Bastiaanssen, M. Menenti, R. A. Feddes and A. A. M. Holtslag
A remote sensing surface energy balance algorithm for land (SEBAL) 2. Validation 213
W. G. M. Bastiaanssen, H. Pelgrum, J. Wang, Y. Ma, J. F. Moreno, G. J. Roerink and T. van der Wal
Inference of surface and air temperature, atmospheric precipitable water and vapor pressure deficit using Advanced Very High-Resolution Radiometer satellite observations: comparison with field observations 230
S. D. Prince, S. J. Goetz, R. O. Dubayah, K. P. Czajkowski and M. Thawley
Modelling the spatial distribution of evapotranspiration on different scales using remote sensing data 250
W. Mauser and S. Schädlich
A model for hydrological equilibrium of leaf area index on a global scale 268
L. Kergoat
Land-surface characterization in climate models: biome-based parameter inference is not equivalent to local direct estimation 287
P. H. Martin
Effects of spatial variability on the rainfall runoff process in a small loess catchment 304
B. Merz and A. Bárdossy
Stochastic generation of meteorological variables and effects on global models of water and carbon cycles in vegetation and soils 318
B. Hubert, L. François, P. Warnant and D. Strivay
Spatial interpolation of the parameters of a rainfall model from ground-based data 335
L. Guenni and M. F. Hutchinson

The use of weather types and air flow indices for GCM downscaling 348
D. Conway and P. D. Jones
A case study of statistical downscaling in Australia using weather classification by recursive partitioning 362
R. Schnur and D. P. Lettenmaier
Modelling low-frequency rainfall events using airflow indices, weather patterns and frontal frequencies. 380
R. L. Wilby
Physical aspects of the Weather Generator 393
M. Hantel and F. Acs

Announcement 412
